Declassified: The Millennium Plan "A Big Game of Chess" Crash

Posted 文庙on 2024-4-20 00:29 Posted in Shell Village, the most popular Chinese social network
Author's Category: Beauty Forum | | Common category: Hot talk | | There are 4 comments.
Key words: the millennium plan, a big chess game, collapse

分享到微信

The first time I heard the four words "a big game of chess", , it has been more than ten years. When someone in WeChat began to mention, ,it seemed mysterious and ,unfathomable. But the speaker is at the high level of the mainland propaganda, , obviously not a self-made word. The way he spoke ,and , spoke again, aroused my extraordinary curiosity. But he didn't want to talk deeply. I guess ,it should be the waste of the former Soviet Union or the Mao era to change soup without changing medicine. It , , was not until I visited the mainland that I met several elders in the respected system that I basically confirmed the meaning of the so-called "new era" and "a big game of chess".

They are knowledgeable,,, have visited the United States many times, are to learn about retired high-ranking officials or senior officials in the West, , and have access to many colleagues or top internal documents. We first talked about Xi Jinping and the already open disputes in the South China Sea, ,the Belt and Road and the fight against corruption. But they scoffed at my views on my selective anti-corruption and ,were reluctant to respond. But the topic turned ,around and proudly mentioned , that Xi Jinping is an extremely remarkable person, , a leader of the inter-age era. As far as I know, , they are not ordinary citizens with a strong sense of personality worship. They solemnly say ,that Xi is in the next game of mysterious chess, big and big, is a thousand-year plan,, and aggravates the tone:

Westerners will never understand and understand!! hey hey, It all showed a mysterious smile. And I say that like many overseas Chinese, ,I read a lot of books., Must have been brainwashed. I immediately blurted out , that he wanted to "liberate all mankind"? They looked ,at me with a smile and ,then said, “What do you know?” “

,In the past, every time we met, , these elders were reasonable and ,courteous, , and we were able to discuss any issues objectively. This time, in spite of the etiquette, ,the joke I was brainwashed, , it should be the first time. Not only am I not angry,, but I believe there must be something in it. What mysterious chess is so powerful, ,, can still play for thousands of years, even Westerners will never be able to figure it out? My 7777th-level students, , who are "student in the West" in their eyes for decades, ", will they learn this ""industrial and agricultural soldiers"? They must have read some secret documents, , or been confused by any medicine, , or something on the way. These dialogues ,have contributed to my ,,extreme curiosity and concern about Xi Jinping, the South China Sea, and early events such as the Belt and Road Initiative.

Out of my obsession with a big game of chess,, I set out to analyze the CCP’s expansionist intentions and international law. ,The public sentiment of the mainland has been incited, and my blog posts on the situation in the South China Sea and its subsequent impact , have been attacked by many netizens. It seems that , most of these statements have become reality. Such as three of them: "The South China Sea defeat in the raging system and the dream of Ah Q", "One step of stinking chess crushed the Chinese dream in the South China Sea" and "South China Sea arbitration will let China fall again." .” Just look at the title, , eight years in advance has predicted the tragic defeat of this big game of chess.

Another chess game with great fanfare is the so-called ""Belt and Road". In May 2017, in the Belt and Road: Is the way to ask the gold or the return of the big red dragon? , In one article, I first proposed the concept of large coins (SB). The term quickly spread across , the web and became a popular term for describing a rotten game. Perhaps this joke , will eventually be gathered into the Chinese idiom dictionary , and become an immortal classic story of Chinese civilization. The Xiong'an Special Zone of the Millennium Plan is the window of the Belt and Road within. These things,, conjured in association, , can be learned about ambition and ambition, , for a long time.

It , was not until five years later, in September 2017, the mainland mouthpiece Xinhua.com ""decrypted" for Xi Jinping’s “A Game of the Big Game” and is now attached to the text. However, this is only an official fascination article, , and the actual chess details or strategic purposes are far , more complex or exciting than the official description, and , more unspeakable. It is now 2024,, This big chessboard has been basically revealed, , and some people say it is stinking chess..., such as the self of the 2016 period. But now it seems , that Xi Jinping's big game of chess is a brilliant epic strategic layout, , perhaps unprecedented and after the arrival. Because this game has changed China, ,, changed the world, and completely changed the fate of mankind, , it is worth recording and discussing in detail.

When I blurted out, ,Xi Jinping wanted to "liberate all mankind" for his big game, seems to have cut the theme. Xi Jinping to protect the family, ,the core layer of the party and other generations of hereditary authoritarian corrupt interests, , to achieve the goal of eternal

enslavement of the Chinese people, , we must eliminate the United States, , the elimination of Western civilization,, with the decay of autocratic dictatorship cultural system to control the civilized world. A big game of chess, big foreign propaganda, over-limit war, ,and later the Chinese dream, powerful countries,, east and west landings, etc., , in fact, around this theme has been turned around. But Stalin,, Mao Zedong's traditional subversion or people's war (human-meat tactics), clearly failed to achieve their goal of liberating all mankind, , especially against a country like the United States, , which was useless.

Over-limit warfare is at the heart of a big game of chess. The book was written at the end , of the last century and was introduced to the U.S. Naval Academy in 2000. I have a Chinese version of 2011 in my hand. After the rise of the school, ,I love the "ultra-limit war". According to the Hulu painting, ,all kinds of means at home and abroad are fully scattered. To do great things is to create a personal worship. The path of the learned leader,, walking not smoothly, ,always cover up, ,do a thief's appearance, , tossed for many years. The reason is that there is a chessboard, , no progress.

He did not abandon his traditional military strategy. The reclamation of reefs in the South China Sea,,,, the savings of the Philippines, even with the ruling of the International Court of Justice, can be said to be a piece of waste paper. The long-term deafness of the United States and the West ,has made Xi taste the sweetness, , and the pace , of expansion with the Belt and Road and wolf diplomacy has become more and more unmanageable. The , ""over-limitation" "mode of scientific and technological innovation curves, manufacturing 2025 in China 2025, etc., dealing with the world, , are familiar with muzzle guns, , which have reached their peak before the epidemic.

Whether it is military affairs ,in the South China Sea, trade policies that distort the laws of the market, and ,the theft of Chinese and foreign scientific and technological cooperation,, have occurred before Xi Jinping came to power, ,but there , is more and more moderation, and there is no big movement. But the internal intensive game of chess propaganda,, , for all these stolen and cheating of the next three bad means, opened , the green light, so that these scourges spread like floods quickly to the main developed , countries, and the previous Belt and Road Initiative was mainly aimed at less developed countries. The CCP has found a model to bring down the U.S. Empire: using developed countries such as the United States to make a lot of money,, build up armaments, ,buy other countries' dignitaries and small nation-building, , try to use money to control all the media inside and outside, , from time to time to beat chicken blood, , to create an atmosphere of east and west, ,these systematic operations let a game of chess, seemingly mysterious and blew up the sky, , so far the soul.

To decipher a game of super-limit warfare, ,we must mention the rise of Guo Wengui. As the gloves of the top of the system escape. His revelations exposed ,some of the CCP's unspeakable underworld actions and ambitious plans, collectively known as "blue and gold", to the world. In fact, the rise of the disclosure culture , has dealt a major blow to a big chess program, especially the leakage of ultra-limit warfare, , which shocked the United States. Netizens , are not interested in the authenticity of certain data, internal struggles and Guo's true identity and later behavior. The explosion, even if there is a false element, , has caused a huge network sensational effect in objective terms.

Because of the long-term blue-gold strategy and the greed of capital,, the CCP has made the CCP profitable for a long time, ,and has been pressing, ,as if a big chess plan has been or will be about to eat the United States and Western countries. In the late Obama administration in 2015/2016, , the US think tank has proposed a strategic adjustment response, ,but ,the two parties and the public have huge strategic differences, , which makes Xi see the victory of the over-limit war game. When Obama visited, , there was no red carpet, ,and the door could not be found on the plane. As for Xi's commitment to the suspension of the construction of the South China Sea, the ,competition was thrown into the waste paper basket, , and the Olympic did not have any response. Such humiliation ,is ,to test the other party's red line and patience, how hard to be.

Before Trump took office, he was tough on China, ,but after taking office, he did not adjust his policy toward China ,and immediately regarded it as a matter. He still praises Xi Jinping from time to time, , fantasizing about meeting Xi as soon as possible, , but he does not rule out that he has the purpose of testing Xi.

Xi has been full of anger at this time, , that Americans are not so, ,or Hu Angang and other masters have vision, ,China has long surpassed the United States in various fields, , it is no longer possible to say that Obama no longer speaks. Jiang and Hu are really useless waste, , and they have read books for so many years. The world should all come to the Forbidden City to bow down, ,, not to mention just gave the Sichuan family business a green light, and did not quickly thank the Lord Longn? Eating Trump as a businessman,, Xi believes that it is easy to use the means of over-limit warfare.

According to the review of the former White House national security adviser, in November 2017, when Trump visited China, he spent time visiting the Forbidden City, ,and , suddenly threatened Trump and others. He asked Li Keqiang to threaten the United States in his speech, , withdraw from the Asia-Pacific region, withdraw from high-tech and other fields, ..., and let China dominate the world. In the future, the United States will only be endowed with the affiliated countries of the Celestial Empire, such as the basic supply of Chinese energy and agricultural products.… The CCP later publicly designated it as the national policy of the “community of human destiny”. Trump was furious and ,left immediately. Readers will ask, , is it crazy?, In total disregard for diplomatic etiquette,, what is the purpose of saying these words in front of the guests? National events are not a child's play, what if the VIP turns his face?

Obviously, all this has been refined and rehearsed, , and the threat is for the sake of it, , because “"the rise of China is unstoppable." Overlord hard bow, there is no B plan, there is no other choice, , not to mention the retreat, this is the bottom line or the bottom line thinking, , the so-called "four self-confidence" of the wonderful Tian Dynasty culture. Think of Xinhua.com's "18th National Congress, Xi Jinping laid out a game of what kind of big chess" (see below), also published in the same year. This is also to announce to the world that I have already arranged and ,not pretended. You are here , to bow down and ask me. No matter what happens to you Americans, I don’t care!

On Trump’s team, there is a young national security adviser named Bo Ming in Chinese. He was brutally stopped by his mainland bodyguards, , which had never happened before. Because ,he lived in the mainland and studied Chinese history and culture, he almost

immediately saw through the resurrection of Xi's great and decaying feudal cultural mentality. On the return plane, , Trump asked everyone in the United States to write a short feeling,, and everyone's response was consistent. The CCP's hostile attitude and undisguised ambition ,validate the strategic adjustment measures that have been proposed by the think tank. The White House immediately established a new national policy of strategic change and counterattack. Then came the U.S.-China trade war, , and the world began a sharp turn.

More than a year before the trade war began, , ,in the clamor of a large area of "the United States is scared and pissed off", , a very few official Beijing think tanks , have made bold predictions about the prospects of Sino-US relations, including the trade war, , and have also made cautious suggestions. But the CCP and Xi are full of confidence, , shouting big and big wins, , small and small wins, , lying down and winning powerful national slogans. To test the ,proverb of God's desire for its destruction must first be made mad. In fact,, until the outbreak of the epidemic, , the trade war did not achieve obvious decoupling effect, , and the CCP still made a lot of money. But the public opinion effect and the offensive of flipping the public psychology ,have completely reversed the prospects and follow-up trend of US-China relations.

At the same , time, the Hong Kong occupation of Central and later anti-transmission movement surged. Anti-dictatorship, anti-tyranny video is transmitted to all corners of the world every day, , which is linked to the US-China trade war, ,and makes the people of the world see the face of the CCP. The voices supporting the containment of tyranny began to emerge, , and some , speculative businessmen who were deeply involved in US-China trade and bent on making a lot of money were shaken. The people of Hong Kong have reversed international public opinion,, encouraged the people of Japan, South Korea and Vietnam, and , changed the long-term appeasement policy of Western countries. Hong Kong has become a heroic city,, and although the speculation (immolation with China) has paid a heavy price, , it has successfully blocked the dream of a big game of chess., Hong Kong's move , has also completely changed the people's perception of the CCP in Taiwan, , Tsai Ing-wen was re-elected as the president of the Republic of China with a high vote, , and the main point of Xi's big game of chess was forced to die.

The dictators are very fond of face, , and Xi Jinping is surrounded by more ass. The farce of the sky or the Tang Dynasty is also becoming more and more frequent. Seeing the trade war,, the Hong Kong protests and so on could not be quelled, , and the most powerful trick in a big game of chess ,was tightly moved.

The earliest biological warfare video recording is Chi Haotian's 2005 speech. CCTV announced on April 5, 2018, that , the coronavirus and vaccines are ready, ,and it seems that everything is only owed to "personal deployment, ,personal command". Since the summer of 2019, , virus or infectious disease exercises have sprung up across the country. It is worth remembering that on September 18, 2019, , Wuhan Tianhe Airport staged the exercise of "the whole process of new coronavirus disposal", ,which was reported by many party media. On September 1, 2020, ,CCTV released a short video. The CCP, who is responsible for taking over the Wuhan P4 Institute of Virology, like Chen Wei, carelessly told a group of children that on February 26 of that year, the new coronavirus vaccine was manufactured from the production line, , and it was a "formal vaccine."

At this time, the first official case of the virus ,in the United States has not yet been determined. ,Many people, including myself, were confused by these unscrupulous propaganda. Is there so much obvious evidence left , that you are not afraid of external accountability? Now, , Xi doesn't care about releasing the virus with big fanfare and ,messing up the world. Because the CCP has been preparing for the vaccine and ,is convinced of its superior quality, , the United States has been unable to cope for several years. Because there is no vaccine for the outside world, ,only waiting for the end of death. There are also anti-epidemic materials supply chain in the hands, ,all countries should come to worship, , to copy the work. The ignorance, ,arrogance and arrogance of learning far exceed the imagination of ordinary people, ,and so far have been exposed.

The official instilled that , the United States is definitely finished this time. ""It's the virus I put , in, what can you do?" You can throw it over you or anyone else, anyway: "It's you, , it's you! "There is no need for any logic or evidence. In the three years of the epidemic, , especially in the spring of 2021,, there are a large number of articles in WeChat, ,,overwhelming, and constantly clamoring for the United States to disintegrate immediately (three days). Afraid of international accountability? Jokes,, a big game has already been arranged. China is certainly the world's first anti-epidemic victory, ,and after the epidemic,, it is also the only country that has developed rapidly. The United States is the eight major losers in the fight against the epidemic...,... and it will never be qualified to call the boss of the South China Sea again. The bones of millions of people seem to have made Xi Jinping great and extraordinary.

The CCP's ignorance and hubris , really confuse the people inside the walls and the overseas Chinese who were kidnapped in a big game of chess. The extreme clean-up policy is the god of the long-standing US-China trade war, , coupled with the Biden administration's restrictions on technology, investment and chips, , etc., the withdrawal of foreign investors, ,investment stagnation and the decoupling of the industrial chain have quietly formed an irreversible trend. The secondary disasters caused by the long-term blockade , are countless, , the mainland people have paid a heavy price for a big game of chess, ,and the white paper movement has spread rapidly. Finally, at the end of 2022, The cruel clean-up measures could not be sustained, , and Xi was forced to copy the outside world's work. Despite desperately blocking the news, the sudden turn and ineffective vaccine caused a large number of sudden deaths of patients, , the crematorium broke out, , and videos of burning corpses everywhere could not be lined up all over the world. The longest layout time in a big game of chess,, and the most bragging is the biological super-limit war. ,Under the personal deployment and command of Xi, he , finally ended with a fiasco of killing one hundred and ten thousand self-defeating.

Within the mainland, , starting from the spring of 2023, ,with the withdrawal of foreign ,investors, investment stagnation and the decoupling of the industrial chain, ,foreign trade income, the real estate market and the stock market have fallen, ,while unemployment, ,bankruptcy and homelessness have increased sharply. Now many people are beginning to understand ,the inevitable consequences of eating American rice and smashing American pots. The new area of Xiong'an, which has been blown into a thousand-year-old plan, has become a place of overgrown punching. Xi's rescue measures , have been renovated on average every day, , but with little success. It is estimated that about 800 million people are in debt, 400 million are undeposited, ,and it is expected that 400 million people will become

unemployed, , or officially called flexible workers. The three major international rating agencies, Qi Qi, rated China as negative, , and the people's confidence fell to a freezing point. At the same time, the Xi Cong began to seize agents, ,promote the experience of the maple bridge of the people, , and step up the oppression and control of the people. The upper-level Foreign Ministry and the Rocket Force secretly surrendered to the US Empire, ,and all missile secrets were leaked. A big game of chess from the fall of the overall collapse caused by the economic decline, ,the loss of confidence may have just begun, ,the people of the mainland are still on the road. In addition to China, ,the U.S.-Japan economic bull market,, is not self-damaging 10,000?

The external environment has also changed dramatically. The sharp decline in the treasury and foreign exchange ,has led to the destruction of the big coins of the Belt and Road in many places, ,and the younger brothers have run away. In the past, the CCP used to use the goods embargo , or threatened other countries with force, , but now it is not working., We can only rely on the evil axis of Sino-Russian-Iranian union to embolden ourselves. Neighboring countries have re-established ,themselves or went to a direct confrontation, ,such as Japan, Korea, and Fio and other countries. The small NATO in Asia led by the United States has formed , a large number of modern weapons,, from B61 tactical nuclear weapons, medium-range missiles, various types of advanced fighters to submarines and aircraft carriers, etc.,, layer by layer deployment. It has become a ring of iron buckets, , forcing Xi to play a suicide game in the Taiwan Strait or the South China Sea. Will the Chinese re-trapped the "midday storm" predicted eight years ago be re-enacted?

Exploring the reasons , for the collapse of a big chess game can ,be inspired by many factors such as history, culture, system, ideology and civilization, ,but the most fundamental is the feudal royal culture,, which is concentrated on one person, , that is, it has become a disaster for the whole nation. The famous online writer was first called a primary school student, I am very sure. There is no culture, , relying on the book list and reading the wrong words to govern the country, , which limits the improvement of cognitive ability and the three views, , , coupled with personality defects and failed adolescent experiences. Regrettably, a large number of blindly learned from the ass, , including the elite of the CCP, ,are trapped in it , and cannot extricate themselves. The rise and defeat of a big game of chess ,is ,the most thrilling century war in the long history of mankind, and ,you and I are lucky witnesses. 4April 19, 2024)

Since the 18th National Congress, Xi Jinping has laid out what kind of big chess.

http://www.xinhuanet.com//politics/2017-09/11/c_129700705.htm

2017-09-11 09:23:20 Source: Xinhua.com Tip: Full text 3158 words, read in 12 minutes

[When learning is carried out] In the past five years since the 18th National Congress, General Secretary Xi Jinping has taken the time and momentum of national development, made a comprehensive planning and deployment, and carefully laid out a big game of development with a series of big strategies for governing the country.

Xinhua News Agency "learning" original brand column "workshop" will launch a series of articles on the "big chess game" from now on, and today launched the first article - "Since the 18th National Congress, Xi Jinping has laid out a big chess game".

On November 15, 2012, the 59-year-old Xi Jinping was elected general secretary of the CPC Central Committee at the First Plenary Session of the 18th CPC Central

Committee, becoming China's new navigator.

In the past five years, led by the five major development concepts, the Party Central Committee with Comrade Xi Jinping as the core has promoted the overall layout of the "five in one", coordinated the promotion of the "four comprehensive" strategic layout, and a series of important decision-making and deployment, like a piece of pawns, constantly seeking momentum and doing "eyes" in the development of the new era".

Start in January, start with a custom.

No strategy is created out of thin air. Xi Jinping said: "The strategic layout of the 'four comprehensive' is derived from the actual needs of China's development, and from the eager expectations of the people, and is also proposed to promote the resolution of outstanding contradictions and problems we face. "

Before he was elected general secretary, Xi Jinping had more than 40 years of work experience. From village to county, from city to province, Xi Jinping deeply understood China's basic national conditions and deeply understood the wishes and expectations of ordinary Chinese people; after entering the central work, he was directly involved in the formulation and implementation of the party and the state's general policies.

Let us look back at the first month of Xi Jinping's appointment as General Secretary of the New CPC Central Committee:

On November 15, 2012, the first day of being elected general secretary of the CPC Central Committee, in the face of more than 500 Chinese and foreign journalists, Xi Jinping solemnly declared, "The people's yearning for a better life is our goal of struggle."

On November 29, when Xi Jinping watched the exhibition "The Road to Revival", he first proposed the "Chinese Dream" to realize the great rejuvenation of the Chinese nation. He stressed that "talking about the wrong country and doing a good job in Xingbang", he made a strong mobilization to achieve the goal of "two hundred years".

On December 4, when commemorating the 30th anniversary of the promulgation and implementation of the current Constitution with all walks of life in the capital, Xi Jinping solemnly stressed that "the rule of law is the basic strategy for the party to lead the people to govern the country", and pointed out that it is necessary to "adhere to the construction of the rule of law, the rule of law government, and the rule of law society."

On the same day, the meeting of the Political Bureau of the Central Committee adopted the "eight provisions". Xi Jinping and the comrades of the Political Bureau of the Central Committee "co., eight chapters of the law", take the lead in improving the work style, the guiding ideology is to strictly govern the party.

On December 7, Xi Jinping left Beijing for the first time after being elected general secretary, and he came to Guangdong Province, the forefront of reform and opening up, saying loudly, "Reform does not stop, opening up does not stop."

In the first month of his new year, Xi Jinping started at the point of view and

established the forward navigational sign.

In December 2014, Xi Jinping officially proposed during his visit to Jiangsu that ""coordinate and promote the comprehensive construction of a moderately prosperous society, comprehensively deepen reform, comprehensively promote the rule of law, comprehensively and strictly rule the party, and promote reform and opening up and socialist modernization to a new level," the first time will be "four comprehensives".”

In November 2016, Xi Jinping stressed at the Sixth Plenary Session of the 18th Central Committee that the coordinated promotion of the "four comprehensive" strategic layout is a new strategy for the Party Central Committee to grasp the new characteristics of China's development since the 18th National Congress of the Party, and is a strategic choice to promote reform and opening up and socialist modernization construction under the conditions of the new era, and to adhere to and develop socialism with Chinese characteristics.

The report of the 18th National Congress of the Communist Party of China pointed out that it is necessary to fully implement the overall layout of economic construction, political construction, cultural construction, social construction, and ecological civilization construction, and emphasize the construction of socialism with Chinese characteristics.”

Xi Jinping pointed out at the conference celebrating the 95th anniversary of the founding of the Communist Party of China that the "five in one" ”and the "four comprehensives" promote each other and coordinate and implement it well.

The big chess form of governance, and the pattern is presented.

Turn around the sky and do the whole thing.

The comprehensive construction of a moderately prosperous society is the first centenary goal set by our party and a key step in realizing the great rejuvenation of the Chinese nation. This major strategic goal is like the celestial star on the chessboard, in the position of "Chinese army".

Xi Jinping said: "By 2020, to achieve this goal, our country's development level will reach a big level, and all our efforts must focus on this goal." “

All-round well-being means that the fruits of development should benefit all people, and the economic, political, cultural, social and ecological civilization should be comprehensively developed. To achieve this goal, it is inseparable from the strong driving force of reform and opening up, the orderly operation of the national society, and the strong core of leadership.

In Xi Jinping's plan, the three strategic measures to promote comprehensive deepening of reform, comprehensively rule the country in accordance with the rule of law, and comprehensively and strictly ruling the party are like the three ""eyes" that revolve around the celestial star.

Deepen reform in an all-round way, focusing on solving the deep-seated contradictions

and institutional shortcomings we face, and comprehensively ruling the country in accordance with the rule of law, focusing on promoting the institutionalization and standardization of the legal system of the state and social life. A “"broken" one “"standing", like the two wings of a bird, the two wheels of the car, for the comprehensive construction of a well-off society to provide a steady stream of power sources and rule of law protection.

The key to doing China well is the party. Adhering to and improving the leadership of the party is the fundamental and lifeblood of the party and the country. Promote the comprehensive and strict governance of the party, maintain the party's advanced nature and purity, and strive to improve the ruling ability and leadership level, in order to provide fundamental guarantees for the comprehensive construction of a well-off society, comprehensively deepen reform, and comprehensively rule of law.

Therefore, the "four comprehensive" is not a single one, but an organic unity, to "comprehensively, comprehensive balance, highlight the focus, drive the overall situation."

In the past five years, the Central Committee has held six plenary sessions, of which four plenary sessions “have used the "four comprehensive" strategic layouts to carry out thematic research and overall design.

In November 2013, the Third Plenary Session of the 18th CPC Central Committee devoted a special study to comprehensively deepening reform and adopted the Decision of the CPC Central Committee on Several Major Issues Concerning the Comprehensive Deepening of Reform.

In October 2014, the Fourth Plenary Session of the 18th CPC Central Committee conducted a special study on comprehensively governing the country in accordance with the law, and adopted the Decision of the Central Committee of the Communist Party of China on Several Major Issues Concerning the Comprehensive Promotion of Rule of Law in accordance with the Law.

In October 2015, the Fifth Plenary Session of the 18th CPC Central Committee adopted the 13th Five-Year ”Plan proposal, which became the final planning for building a well-off society in an all-round way.

The comprehensive and strict governance of the party is the "hands-on" of this big game of chess. With the victory of the fight against corruption, in November 2016, the Sixth Plenary Session of the 18th CPC Central Committee took the two draft documents of "Several Guidelines on Political Life in the Party under the New Situation" and "Regulations on Supervision within the Party of the Communist Party of China" as the main content, and the special research on comprehensively and strictly ruling the Party. Two important documents are guided by practical problems, and at the above rate, they highlight senior cadres and highlight the political ecology, and are committed to creating a "cage" for the system to provide fundamental guarantees for the development of various undertakings.

On July 26, 2017, Xi Jinping made an important statement on the opening ceremony of the seminar on leading cadres at the provincial and ministerial levels, made an important statement that "Socialism with Chinese Characteristics has entered a new stage of

development", deeply expounded a series of major theoretical and practical issues of adhering to and developing socialism with Chinese characteristics under new historical conditions, and strongly deployed the work of future key promotion.

First hand, mid-sumption.

Xi Jinping once said: "In any work, we must talk about both two points and focus, without the main, without distinction, eyebrows and beards, is doing a bad job." “

To promote the "four comprehensive" strategic layout, Xi Jinping pays attention to grasping the overall planning and holding the "cow nose".” This game, he frequently fell in the key points, played good first-hand chess, traction the overall trend.

“"Well-off is not well-off, the key to the fellows", for the overall well-off, Xi Jinping first in the "poverty out of poverty", across the country to launch a comprehensive fight against poverty. “"Poverty alleviation and development is expensive in precision, focus on precision, success or failure lies in precision", Xi Jinping fell "precision poverty alleviation"”, emphasizing the next “"embroidery" kung fu.

For comprehensively deepening reform, Xi Jinping stressed that "we should highlight the reform of important areas and key links." Under the new normal, China's economy "is the most prominent structural problems, the main aspects of the contradiction are on the supply side", Xi Jinping fell on the “"supply-side structural reform", and launched a decisive battle to comprehensively deepen reform.

For the rule of law in an all-round way, Xi Jinping stressed that it is necessary to "take the rule of law system with Chinese characteristics as the overall goal and the overall starting point." “"To achieve the law, law enforcement must be strict, and illegal law must be investigated," Xi Jinping said, "fair and just", and put forward that "unfair trials must not be allowed to hurt the feelings of the people and harm the rights and interests of the people."

“"I am not right, can correct people", comprehensively and strictly rule the party, Xi Jinping's fall system construction and “"key minority", repeatedly stressed that it is necessary to strictly control the leading cadres at all levels, so that the true management is really strict, dare to be strict, and long-term strict. Starting from the â€œeight regulationsâ€, dozens of internal party regulations have been formulated and revised, and â€œhard restraintsâ€ have been formulated and revised for â€œkey minoritiesâ€; three rounds of intra-party education, focusing on â€œkey minoritiesâ€, “â€œcalcium supplementationâ€ and â€œfuelingâ€ in ideals and beliefs.

Combined with the tasks of the "Thirteenth Five-Year Plan" period, around the overall goal of building a well-off society in an all-round way, he fell "innovation drive", "regional coordination"”, “"green water and green mountains", "community of destiny"...

Every drop is the focus of an important work. Under the guidance of Xi Jinping's plan, all the work is connected and steadily advancing.

His own pile of small nine, originally to do their own political affairs, but will be speculated by the speculative left and political interests to their own good speculation, coupled with the daily daily daily daily newspaper washing, to deceive into a big layout, he himself does not understand how this big picture came out. The core is also their own culture and vision, insight, and low pattern.
